

REGULATION III - CONTROL OF AIR CONTAMINANTS

RULE 320 ODORS AND GASEOUS AIR CONTAMINANTS

INDEX

SECTION 100 - GENERAL

101 PURPOSE

SECTION 200 - DEFINITIONS

201 HIGH SULFUR OIL

202 LOW SULFUR OIL

203 ODORS

204 REDUCTION

SECTION 300 - STANDARDS

301 ANIMAL AND VEGETABLE MATTER REDUCTION

302 MATERIAL CONTAINMENT REQUIRED

303 REASONABLE STACK HEIGHT REQUIRED

304 LIMITATION - HYDROGEN SULFIDE

305 PERMIT CONDITIONS-HIGH SULFUR OIL

306 LIMITATION - SULFUR FROM INDUSTRIES

307 OPERATING REQUIREMENTS - ASPHALT KETTLES AND DIP TANKS

SECTION 400 - ADMINISTRATIVE REQUIREMENTS (NOT APPLICABLE)

SECTION 500 - MONITORING AND RECORDS (NOT APPLICABLE)

AIR POLLUTION CONTROL REGULATIONS

REGULATION III - CONTROL OF AIR CONTAMINANTS

RULE 320

ODORS AND GASEOUS AIR CONTAMINANTS

SECTION 100 - GENERAL

- 101 PURPOSE:** To limit the emissions of odors and other gaseous air contaminants into the atmosphere.

SECTION 200 - DEFINITIONS: For the purpose of this rule, the following definitions shall apply:

- 201 HIGH SULFUR OIL -** Fuel oil containing 0.05 percent or more by weight of sulfur.
- 202 LOW SULFUR OIL -** Fuel oil containing less than 0.05 percent by weight of sulfur.
- 203 ODORS -** Smells, aromas or stench commonly recognized as offensive, obnoxious or objectionable to a substantial part of a community.
- 204 REDUCTION -** Any heated process, including rendering, cooking, drying, dehydrating, digesting, evaporating and protein concentrating.

SECTION 300 - STANDARDS: No person shall emit gaseous or odorous air contaminants from equipment, operations or premises under his control in such quantities or concentrations as to cause air pollution.

- 301 ANIMAL AND VEGETABLE MATTER REDUCTION:** No person shall operate or use any machine, equipment or other contrivance for the reduction of animal or vegetable matter, separately or in combination, unless all gases, vapors and gas-entrained effluents have been incinerated to destruction at a temperature of not less than 1,300 degrees fahrenheit or processed in a manner determined by the Control Officer to be equally or more effective for the control of air pollution.
- 302 MATERIAL CONTAINMENT REQUIRED:** Materials including, but not limited to, solvents or other volatile compounds, paints, acids, alkalies, pesticides, fertilizer and manure shall be processed, stored, used and transported in such a

manner and by such means that they will not unreasonably evaporate, leak, escape or be otherwise discharged into the ambient air so as to cause or contribute to air pollution. Where means are available to reduce effectively the contribution to air pollution from evaporation, leakage or discharge, the installation and use of such control methods, devices or equipment shall be mandatory.

303 REASONABLE STACK HEIGHT REQUIRED: Where a stack, vent or other outlet is at such a level that air contaminants are discharged to adjoining property, the Control Officer may require the installation of abatement equipment or the alteration of such stack, vent, or other outlet to a degree that will adequately dilute, reduce or eliminate the discharge of air contaminants to adjoining property.

304 LIMITATION - HYDROGEN SULFIDE: No person shall emit hydrogen sulfide from any location in such a manner or amount that the concentration of such emissions into the ambient air at any occupied place beyond the premises on which the source is located exceeds 0.03 parts per million by volume for any averaging period of 30 minutes or more.

305 PERMIT CONDITIONS - HIGH SULFUR OIL: Any permit issued for the operation of an existing source, or any renewal or modification of such a permit, shall include a condition prohibiting the use of high sulfur oil by the permittee. The applicant must demonstrate to the Control Officer that sufficient quantities of low sulfur oil are not available for use by the source and that it has adequate facilities and contingency plans to insure that the sulfur dioxide ambient air quality standards set forth in Rule 510 of these Regulations will not be violated. The terms of the permit may authorize the use of high sulfur oil under such conditions as are justified. In cases where the permittee is authorized to use high sulfur oil, it shall submit to the Control Officer monthly reports detailing its efforts to obtain low sulfur oil. When the conditions justifying the use of high sulfur oil no longer exist, the permit shall be modified accordingly.

306 LIMITATION - SULFUR FROM OTHER INDUSTRIES: No person shall discharge into the atmosphere from any industry, reduced sulfur, which includes sulfur equivalent from all sulfur emissions including but not limited to sulfur dioxide, sulfur trioxide and sulfuric acid, in excess of ten percent of the sulfur entering the process as feed.

307 OPERATING REQUIREMENTS - ASPHALT KETTLES AND DIP TANKS:

307.1 No person shall operate an asphalt kettle or dip tank unless the owner or operator controls air contaminant emissions by good modern practices, including but not limited to:

- a.** Maintenance of temperature below both the asphalt flash point and the maximum temperature recommended by the asphalt manufacturer through the use of automatic temperature controls.
- b.** Operation of the kettle or dip tank with the lid closed except when charging.
- c.** Pumping or drawing the asphalt through cocks without dipping.
- d.** Firing of the kettle or dip tank with a clean burning fuel.
- e.** Maintaining the kettle or dip tank in clean, properly adjusted and good operating condition.

307.2 The visible emissions from the operation of an asphalt kettle or dip tank shall comply with the provisions of Rule 300.
